## ISO 27001 GOVERNANCE DEVELOPMENT

### Governance Framework

Using the work product from your earlier Legal and Regulatory Review, and our DIRECTION methodology, we take your Statement of Applicability and develop a logical governance framework to be used as a guide for the development of policy and standards. For organizations seeking to expedite this part of the program's development, ask about our pre-build 27001 control framework, and our policy and standards template package.

### Program Charter

The program charter is a critical document in the overall governance framework, as it serves to mandate the establishment and maintenance of an information security management system (ISMS) in the organization. While not specifically named in the standard, its role is. Typically, authorized by either the Board of Directors or the organization's senior leadership, this document facilitates as a foundational ISMS record, providing the first piece of evidence of the leadership's commitment to the ISMS.

### Policy and Standards Development

We then generate for you, the ISMS policy document and series of policy standard documents articulating your organization's expectations for all in-scope areas captured in your Statement of Applicability.

Don't have the time, ask about our pre-built ISO 27001 policy and standards template set .

### What You Get

At the end of the Governance Development, you get a wire-frame governance framework document, an ISMS charter, policy, and a series of policy standards encompassing 100% of the ISO 27001 controls and those captured during your Legal and Regulatory Review.
