ISO 27001 KICK-STARTER "B" PACKAGE

ISO 27001 Team Training

We begin our four-day Kick-starter "B" Package with our one-day Certified ISO 27001 Foundations Course to provide your team with a basic understanding of the ISO 27001 standard, and the expectations you must to meet for certification.

ISO 27001 Program Scope Workshop

Many clients find it challenging to define the scope of their ISO 27001-based information security management system (ISMS), as required by the standard. Simply put, the Scope is a statement summarizing the boundaries associated with the ISMS. We offer a half-day facilitated workshop to bring your team together and collaboratively work through the dimensions of the ISMS' boundaries. The output is a documented ISMS scope statement. This document is not only required for certification, but provides essential focus for your team, and is included on your certificate.

Coaching & High-level ISO 27001 Project Planning

Our Kick-starter plan includes a half-day workshop with your team to begin the planning process, and 1.5 days of coaching and one-on-one program manager strategy sessions, as well as follow-up documentation of the outcome. Guided by a CIMA facilitator and our 5-phased ISO 27001 methodology, we will work with your team and program manager to build your high-level project plan. Don't have a Program Manager? We can help with that too!

What You Get

At the end of the Kick-starter week, your organization will have a fundamental understanding of the standard, new found focus and a high-level plan to begin the journey of your ISO 27001 initiative.
